Professional estimate line items with status, notes, and totals

Water Pump Replacement — $485

Status: Recommended

Estimate note
Inspect coolant condition, thermostat behavior, belt drive, and seized hardware risk before final approval. Labor time may vary based on vehicle condition.

Inspection notes
Pressure test found coolant seepage from the water pump weep hole.

Service education
The water pump circulates coolant through the engine, radiator, and related cooling-system components.

Common reasons this service may be recommended: coolant is leaking near the water pump, the engine is overheating, the pump bearing is noisy or has excessive play.

Thermostat and Gasket Replacement — $164

Status: Recommended

Estimate note
Additional diagnostics or related system inspection may be required if access, corrosion, or vehicle condition changes the repair path. Labor time may vary based on vehicle condition.

Inspection notes
Replace the thermostat and gasket while the cooling system is drained.

Service education
The thermostat regulates coolant flow so the engine reaches and maintains its proper operating temperature.

Common reasons this service may be recommended: the engine takes too long to warm up, the engine overheats, the coolant temperature is outside the expected range.
